

What doctors say about us

"As a speaker, I can be assured that I have full control over the content of my lecture and that media presentation is always perfect. As a participant, that the symposium is guided by well established CME practices and that talks all fall within these guidelines".

"The benefit in participating in a Serono Symposia International Foundation event is to be part of a fulfilling, rewarding and challenging event and be able to exchange ideas and thus enhance the progress of science".

"A greater educational opportunity than in the large international meetings".

"... Better able to network with other leaders in the field. Due to the more focused discussions, I get the latest data on more specific topics".

"... it is possible for all the participants to be in close contact to the speakers and to have a good discussion...I am sure, that the benefit for the speakers and the participants of this Serono Symposia International Foundation event is very high and I am looking forward to the next one".

"... You can transmit information in a more effective way. Personal communication is better in such a kind of meeting".

"... Where participants can meet the speakers and have useful and interesting opportunities to begin new works in important fields".

"... the benefits for me were the opportunity to cross the experiences with high level experts involved in such different aspects of autoimmunity, and these exchanges with other disciplines is of major importance to raise original and synergistic research, as well as to raise an integrated view of autoimmune diseases in future CME meetings".

"I am impressed by the standard of Serono Symposia International Foundation events which have an advantage of being tailor made to the audience, deliberately involve all members of the audience and seek their involvement in decisions and management".

"... Top level proceedings of the meeting are generally produced and usually represent a reference point in the field addressed by the meeting.".

"I have always been impressed during my long career about the scientific quality of SSIF.".

"Presentations, as a whole, have more relevance to updating the latest developments in pediatric endocrinology in a form more relevant to the practicing physician... Opportunity to reach and interact with practicing pediatric endocrinologists...Interact with top drawer faculty - we learn from each other".
