

Course Description

This program was developed by Serono Symposia International, Inc.

This educational program was designed to provide physicians, nurses, and pharmacists with the most up-to-date information on the morphologic and metabolic complications of HIV and HAART.

Learning Objectives

Upon completion of this program, the participant will be able to:

- Identify common morphologic complications of HIV disease and HAART
- Discuss emerging treatment options for HIV-associated fat redistribution syndrome
- Review current data on metabolic complications of HIV disease and HAART
- Discuss the prevalence, gender differences, impact on therapy, adherence, and quality-of-life issues of these complications
- Develop clinical management strategies
