

Multiple Sclerosis: A global overview

ms ar no

Buenos Aires

8. 9. 2006 9. 9. 2006

The aim of this symposium is to produce a highly scientific and interesting program covering aspects concerning epidemiology, clinical aspects, current treatment options and future therapies in MS, through a balanced agenda of lectures and clinical vignettes. This program is designed to improve the working knowledge and skills of general neurologists interested in the care of Multiple Sclerosis patients.

At the end of the course the attendees will be able:

- To know the epidemiology of Multiple Sclerosis
- To understand the immunopathological mechanisms
- To know and to apply the current diagnostic criteria
- To evaluate and to use the available therapeutic options
- To know the impact of cognitive impairment in MS
- To know the current concepts about regenerative medicine and emerging therapies in Neurology

Neurologists interested in the care of MS patients.

Serono Symposia International Foundation (www.seronosymposia.org) has submitted the following CME activity for accreditation by the European Accreditation Council for Continuing Medical Education (EACCME). The EACCME is an institution of the European Union of Medical Specialists (UEMS), www.uems.net

This program "*Multiple sclerosis: a global overview*" (September 7-9, 2006 – Buenos Aires, Argentina) has been approved by EACCME for a maximum of 9 (nine) hours of European external CME credits. Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity.
