

Neuroepidemiology in the Mediterranean Area

ms it

Palermo

8. 4. 2001 10. 4. 2001

Association Neuroméditerranée Neuroméditerranée III

The meeting brought together investigators from different Mediterranean countries in order to enhance research collaboration between them and to foster multi-center studies in the field of neuroepidemiology.

The meeting was reviewed and approved by the European Federation of Neurological Societies.

OBJECTIVES

- To understand the frequency and distribution of neurological disorders in Mediterranean countries.
- To learn more about the epidemiological investigations on neurological disorders currently in progress in the Mediterranean area.
