

## The 2nd European MS Nurse Workshop

ms fr

Paris

22. 4. 2001 22. 4. 2001

This workshop was designed to provide nurses who treat Multiple Sclerosis patients with up-to-date information on the latest care options available. It focused on the treatment of therapy side effects from the nursing perspective.

The workshop used a combination of lectures and interactive working groups to develop effective strategies for nurses to cope with these topics.

### **OBJECTIVES**

At the conclusion of this workshop, the participant was be able to:

- Understand the psychological impacts of chronic care on patients and care givers.
- Develop strategies to encourage patients to remain on needed treatment.

### **ACCREDITATION**

Application for accreditation has been made to the European Federation of Neurological Societies.
