

The changing face of MS: Understanding populations, treating individuals

ms de yes . . 400 400

Berlin

23. 2. 2008 24. 2. 2008

This conference aims to produce a highly scientific programme covering the innovative aspects in the MS management. This new approach will highlight the chance to differentiate MS phenotypes, leading to a new era of tailor-made patient treatment.

The principal objectives of the conference are to:

- Analyze the changing face of MS and its epidemiology and genetics;
- Investigate on elements to predict individual disease course;
- Identify the various MS forms;
- Examine tailored MS therapies;
- Update on cornerstone and emerging strategies for management and treatment of MS

Clinicians managing patients with MS.

Serono Symposia International Foundation (www.seronosymposia.org) will submit this programme “The changing face of MS: understanding populations, treating individuals” (Berlin, Germany, 23-24 February 2007) for accreditation by the European Accreditation Council for Continuing Medical Education (EACCME), by the Royal College of Physicians, UK, by the Ärztekammer Berlin and by the Italian ministry of Health.
