

Cryopreservation of Human Oocytes, Ovarian Tissues and In Vitro Maturation (IVM)

rh ar no

Buenos Aires

13. 3. 2008 15. 3. 2008

The Symposium is geared toward covering the most recent advances in both, the basic aspects and the clinical application, of cryopreservation and IVM in reproductive medicine.

At the end of this program participants will have a greater knowledge on:

- New developments in culture and cryopreservation technology
- The current status of clinical implementation of IVM

Biologists, gynecologists, oncologists, pediatricians
