

Optimizing Infertility Treatments, Outcome and Physician's Care

rh br no

Rio de Janeiro

30. 9. 2004 2. 10. 2004

To provide a forum for interested general physicians involved in the clinical practice with the reproductive field that could be solved with low complexity treatments. It reviewed many aspects of reproductive endocrinology, male and female infertility, trying to develop a rational bases for the diagnosis and main therapeutic approaches, including complications, that could be performed in a basic laboratory.

OBJECTIVES

At the end of the Symposium, the participants were be able to:

- Identify an infertile couple
- Discuss and propose appropriate treatments
- Understand therapeutic tools and limitations
- Understand how to deal and prevent common complications.

TARGET AUDIENCE

Every general clinician involved in the reproductive field such as obstetricians, gynecologists, endocrinologists and urologists.
